Growth of \$10,000 Since Inception

The chart represents past performance and is not intended to imply future performance. This illustrates the performance of a hypothetical \$10,000 investment made on 12/31/2014 and assumes reinvestment of capital gains and dividends.

Mutual fund investing involves risk, including the possible loss of principal value. The Fund's investment in securities of mid-cap and small-cap companies may be more volatile and less liquid than the securities of larger, more established companies. The Fund may have a relatively high percentage of assets in a single or small number of issuers, which may result in increased volatility. Foreign companies may involve risks not generally associated with investment in the securities of U.S. Companies, including risks related to political, social and economic developments abroad and differences between U.S. and foreign regulatory requirements and market practices, including fluctuations in foreign currencies.

Investment performance reflects fee waivers in effect. In the absence of such waivers, total return would be reduced.

You should consider the Fund's investment objectives, risks, charges and expenses carefully before investing. The prospectus contains this and other information about the Fund. For more information about the Fund or to receive a prospectus, call us at 844.406.4960. Please read the prospectus carefully before investing.

Total return includes reinvestment of dividends and capital gains and in the absence of which total returns would have been lower. Portfolio holdings are subject to change.

The Russell 2500 Index™ (R2500) Index measures the performance of the small to mid-cap segment of the U.S. equity universe. The Russell 2500 Index is a subset of the Russell 3000® Index. It includes approximately 2500 of the smallest securities based on a combination of their market cap and current index membership.

The Russell 2500 Growth Index™ (R2500G) measures the performance of the small to mid cap growth segment of the U.S. equity universe. It includes those Russell 2500 companies with higher growth earning potential as defined by Russell's leading style methodology. The Index returns do not reflect the deduction of expenses, which have been deducted from the Fund's returns. The Index return assumes reinvestment of all distributions and does not reflect the deduction of taxes and fees.
